

HÜRNER GÜLF

EXCELLENCE ENGINEERING SOLUTIONS

"Your customer doesn't care how much you know until they know how much you care"

HÜRNER Schweisstechnik Gulf L.L.C has over 15 years of experience in the UAE and we are part of the country's story.

HÜRNER GULF commenced its operations in Dubai United Arab Emirates in 2009, and today we are a leading company in construction industry supplying of high value-added quality products and cost-effective engineering solutions in the GCC countries.

The company direct involvement in the construction market has resulted in a continuous expansion and diversification of its activities, introducing new technologies and innovative products, and maintaining reasonable stock quantities of all our products in Dubai UAE.

We believe in our core values **Be Honest, Be Innovative, Be Patient**, and trying doing them better than everyone else which today make us leader in Plastic welding technology provider in the GCC.

At HÜRNER GULF, our greatest strength lies in our exceptional team. Comprised of dedicated professionals from diverse backgrounds, our team members bring a wealth of expertise and passion to the table. Their collaborative spirit and commitment to excellence drive the innovation that defines our company.

2009

Founded:
HÜRNER Schweisstechnik GULF LLC.
Successfully launched the inaugural product HÜRNER Welding Technology in GCC

2010

Product Expansion:
Introduced HSK Extrusion and Hot Air Welding products.

2013

New Product Line:
Expanded the product portfolio with the launch of ELOFIT HDPE FITTINGS by NUPI Industrie Italiana demonstrating a commitment to meeting evolving market needs.

2014

Abu Dhabi Expansion:
Opened a new branch in Abu Dhabi, a strategic move to expand the company's presence in a key market and strengthen relationships with clients.

2016

ADWEA Approvals:
Achieved regulatory approvals for ELOFIT, showcasing HÜRNER GULF commitment to quality and adherence to industry standards

2019

Diversification:
Introduced ELOPRESS, a cutting-edge addition to the product portfolio, reflecting HÜRNER GULF dedication to continuous innovation and staying ahead of market trends.

2024

15 Years of Success:
Celebrated the 15th anniversary. Acknowledged the invaluable contributions of the team, the loyalty of customers, and the support of partners.

At HÜRNER GULF, our commitment to excellence extends far beyond the sale. Our after-sale service for machines & Tools is a cornerstone of our customer-centric approach. We understand that the real measure of our success is not just delivering quality machines but ensuring they operate at peak efficiency for the long term. Our dedicated after-sale service team stands ready to provide comprehensive support, addressing any queries, concerns, or maintenance needs promptly. From troubleshooting technical issues to offering proactive maintenance solutions, we are committed to maximizing the lifespan and performance of your equipment. At HÜRNER GULF, our after-sale service is not just a promise; it's a guarantee of continued satisfaction and reliability for every products we deliver.

At HÜRNER GULF, we believe in staying at the forefront of industry trends and equipping our clients with cutting-edge solutions. Regular participation in industry exhibitions is a testament to our commitment to innovation. These events provide us with a platform to showcase our latest products and technologies, offering clients firsthand insights into our advancements.

we understand the importance of knowledge sharing. As part of our dedication to client empowerment, we organize training sessions to ensure that our clients are well-versed in utilizing our products to their full potential. These training programs are tailored to address specific needs, ensuring that our clients not only receive top-notch products but empowering them with the tools and knowledge necessary for success in their respective industries.

HÜRNER

SCHWEISSTECHNIK

HÜRNER Schweisstechnik develops, manufactures, and sells devices and systems for welding thermo-plastics throughout the world, HÜRNER has been placing itself on the map as the brand for welding technology "Made in Germany." We are proud to have achieved this since 1976!

This is the result of a corporate strategy that consistently focuses on plastic jointing, stressing pipeline system management as the major field of application, and that has set the standards of efficiency and perfection for this technology by a broad product portfolio and innovative developments.

HÜRNER offers innovative and high-tech Electrofusion and Butt-Welding systems for Water & Gas pipelines construction as well as solutions for infrared welding applications in the microchip and food industries.

Our Electrofusion units welding range goes up to 2000mm, CNC and Manually controlled butt-welding machines can weld any plastic pipe from O.D 32mm to O.D 1600mm.

HÜRNER logo means state of the art products, you'll find automatic welding data recording, either with the welding system itself or with an add-on report generation unit.

Accessories for Plastic pipe related and data transmission and management solutions to plan piping system maintenance and trace every single joint are complements to our comprehensive product range.

HÜRNER Schweisstechnik is your knowledgeable partner for PE, PVDF, PVC Pipes & Fittings jointing technologies, weather it is small or large diameter for welding of Electro Fusion, Butt Fusion Pipes & Fittings, Tools & Accessories for Water & Gas Piping network installations.

HÜRNER BUTT-WELDING

HÜRNER WHITELINE CNC ECO 2.0

The HÜRNER CNC ECO 2.0 is a high-quality and durable, next-generation CN-controlled plastic pipe butt-welding machine. The design of the machine is such that with 12 basic machine chassis models, pipes from O.D. 40mm to 1600mm can be welded.

HÜRNER WHITELINE WELDCONTROL 2.0

The handling of a WeldControl machine is simply unique and it enables an approach to welding no other system is able to offer. Either the operator makes use of the assistance of the interactively responding hydraulic and control unit. Or the manual mode is selected to make the joint "by hand". The design of the machine is such that with 12 basic machine chassis models, pipes from O.D. 40mm to 1600mm can be welded.

HÜRNER WHITELINE MANUAL HYDRAULIC

The Manual Hydraulic Series of butt-welding machines in the WhiteLine generation makes a statement by its superior manufacturing quality and its scalability in the form of an easy upgrade to a data logging-enabled machine with the installation of an SPG 2.0 data logger for welding report logging. The design of the machine is such that with 12 basic machine chassis models, pipes from O.D. 40mm to 1600mm can be welded.

HÜRNER WHITELINE SMARTLINE HYDRAULIC

The Smartline Hydraulic Series of butt-welding machines in the WhiteLine generation makes a statement by its superior manufacturing quality and its scalability. The design of the machine is such that with 4 basic machine chassis models, pipes from O.D. 40mm to 355mm can be welded.

HÜRNER ELECTROFUSION

HÜRNER HST ELECTROFUSION WELDING MACHINES Welding Range up to 2000mm

HÜRNER Electrofusion Welders with Report Generation Version 2.0

The WhiteLine welders cover all areas of application in electrofusion welding of PE, PP, and PVDF pipes with heater coil fittings. There is no challenge for which you will not find a welder of the series able to take it on successfully.

HÜRNER Electrofusion Welders without Report Generation Version 2.0

The WhiteLine welders cover all areas of application in electrofusion welding of PE, PP, and PVDF pipes with heater coil fittings. There is no challenge for which you will not find a welder of the series able to take it on successfully.

HÜRNER WHITELINE HST 300 Mini & Smart

The HÜRNER HST 300 Smart & mini is the most recent member of the 300 line. The new model version, too, makes a difference by its professional welding control characteristics and data traceability management, incl. PDF data transfer, for an operating range inclusive of fittings of up to 160 mm & 180mm of diameter.

HÜRNER Electrofusion Welders for Sanitary Applications, Version 2.0

HÜRNER Electrofusion Welder HST – S – 160 & HST - S - 315
HÜRNER's all-purpose electrofusion welder offers easy, convenient, and expert welding of PE fittings sized 40 - 160 mm & 40 - 315mm in wastewater and roof drainage applications.

HÜRNER WORKSHOP TECHNOLOGY

HWT 160 & 400 LINE

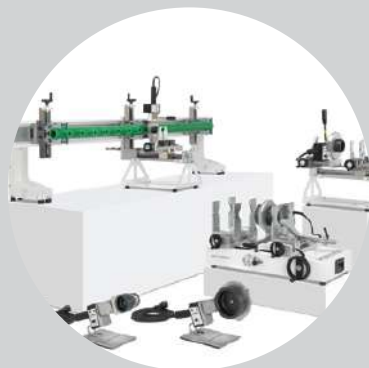

HÜRNER HWT 160 & 400 Line is the end-to-end transformation of worksite technology into workshop systems, for jointing PVC, PE, PP, & PVDF,

Consequently, the HÜRNER HWT 400 mm workshop line, too, has systems of the versions CNC (HWT 400 CS), WeldControl (HWT 400 WeldControl), and Manual Hydraulic (HWT 400 M).

HWT 160-M

A practical plastic butt-welding machine for jointing PE, PP, PVDF pipes and fittings from O.D. 32 - 160 mm (1½" - 6") with the heating element process, this tremendously mobile next-generation welding machine for on-site and in-shop applications is extremely versatile and especially suited for sanitary installations, drain piping, and pressure pipes for water networks.

HWT 160 SW-S

This professional socket welder for saddle-style fittings is designed for all-purpose welding applications in PP, PP R, and PEHD pipeline grids, to make branch offs of O.D. 20 - 90 mm from straight pipelines of O.D. 40 - 160 mm. It is the ideal choice for making manifolds.

HÜRNER TOOLS & ACCESSORIES

HÜRNER plastic pipe Cutters, Scrapers for Pipe Ends and Saddle Areas, All purpose Pipe Aligner, Handheld Heating Elements, Socket Welders, Pipe Squeezing Devices etc...

In 2022, Nupi Industrie Italiane S.p.A. celebrated its 50th anniversary! In October 2015, it took over from Nupigeco S.p.A., founded in October 2008 from the merger of NUPI S.p.A. and GECO System S.p.A., to form a single large company. Combining their many years of experience and constant growth, the two firms decided to create a new flexible and advanced company, ready to play its role to satisfy the demands of the market whilst being environmentally astute.

The goal was to combine the expertise in the development and production of piping systems for plumbing, industrial applications, gas, irrigation and heating, with the experience in the production of polymer pipes specifically dedicated to Water, Gas oil, chemical and petrochemical fields.

FATTURATO
DA ESPORTAZIONE

80% Exports Turnover

Nupi plants occupy 75.000 square meters on a 300.000 square meter surface area and there are warehouses in France, Spain, and United Kingdom. 5% of the total company turnover is invested in Research & Development, with an internal department dedicated to investigating the resistance to sanitizing compounds with a specific test facility at our plants. In 2022, 80% of the company turnover came from exports worldwide. NUPI Industrie Italiane S.p.A. pays great attention to customers, thanks to the Technical Assistance and After-sales service, Quality Department, Training Center at each authorized distributor.

EloFIT

ELOFIT polyethylene (PE, HDPE, LDPE) Fittings are produced by NUPI Industrie Italiane S.P.A. The factory produces in accordance with standards UNI EN ISO 9001, ISO 14001 and BS OHSAS 18001. They comply with standards UNI EN 1555, ISO 4437 & UNI 9736 for the transport of fuel & gas. They comply with standards UNI EN 12201, ISO 4427, UNI 9736 for the transport of water and UNI EN ISO 15494 for industrial applications

ELOFIT Product RANGE

Spigot (Butt Welding) Fittings from 20mm to 630mm, Stub Flange 25mm to 1000mm, Electro Fusion Fittings from 20mm to 315mm, Electro Fusion Couplers from 20mm to 1000mm, Electro Fusion Tapping Tee's with & without Valves, & Branch Saddle from 20mm to 1000mm.

EloPRESS

ELOPRESS PP Compression Fittings allow for a quick, simple mechanical installation on the Pipes with a maximum pressure of 16 bar for transporting water and fluids for Irrigation networks as well as human consumption.

ELOPRESS Fittings are designed & manufactured according to UNI9561.

ELOPRESS FITTINGS are solid & robust designed to ensure maximum reliability and resistance while maintaining compact size & ease of installation.

ELOPRESS Product Range

Threaded Adaptors, Couplers, Reducing Couplers, Tee's, Reducing Tee's, Threaded Tee's, Threaded Elbow's, Repair Couplers, End Caps are available from 16mm to 110mm.

Clamp Saddles with & without SS ring are available from 25mm to 160mm.

HSK

HSK Plastic Welding Technology GmbH in Bad Honnef is one of world leading manufacturer of thermoplastic polymers welding equipments for construction and industrial use.

We offer an extensive range of hand welding extruders, hot gas welding sets, and wedge welders.
